ASD OVERVIEW

The Graduate Certificate in Autism Spectrum Disorders provides additional training for professionals with specific focus on knowledge, skills and competencies for working with students with ASD. The program is composed of four graduate courses that can be incorporated into a master's program of study in Exceptional Student Education or taken as an add-on to an undergraduate or graduate degree. Each course includes a field-based component. Students may complete field-based assignments in their own classrooms or schools if they serve students with ASD. There are also opportunities to complete these assignments at Project ASD demonstration sites. This program is approved by the Florida Department of Education as meeting requirements for State Endorsement in Autism.

(Administrative Rule 6A-4.01796)

Required Courses 12 Credits hours
